

Edgedale Green @ Punggol East C31

Instead of using conventional screed with wash pebble, the architect selected Davco's Sanitized Colorfiller(yellow colour), mixed with coloured washed pebble to achieve a rustic feel that compliment and blends with the landscape décor in the open area. The contrast of the yellow colour filler against the dark red pebble created a pleasant and cheerful atmosphere in the open area and enable the residents to enhance their enjoyment of the surrounding landscaping.

This is a new built to order (BTO) residential development (Punggol East C31) ,with 582 units, is located at Compassvale Link and right next to the Buangkok MRT station.

This residential development has extensive landscaping and tree planting beautifying and greening the surroundings. The focal point is an open area designed to encourage the residents spend time appreciating the garden atmosphere, relaxing, mingling and getting to know their neighbours. atmosphere, relaxing, mingling and getting to know their neighbours.
